

University Computer Club
Box 22, M300
Guild of Undergraduates
University of Western Australia
35 Stirling Hwy, Crawley, 6009

Saturday March 18th, 2006

Dear Sir/Madam,

The University Computer Club at the University of Western Australia (www.ucc.asn.au) is seeking sponsorship in 2006.

The University Computer Club was founded in 1974 to enable the advancement of West Australian computer science. Thirty two years later, the UCC continues to be a thriving member of the West Australian computing community. Today, the UCC offers users a variety of computing environments, offering access to not just Linux and Windows, but also Solaris, Tru64, IRIX and BSD.

Over the years, the UCC has seen a lot of Sun hardware come and go including a Sun 3/280 (mackerel), a 3/60 (marron), a 3/180 (mulloway), an Ultra 30 (seriola), an Enterprise 4000 (manduba), plus many SPARCstations, SPARCclassics and other Sun desktops. Today, an Enterprise 6000 (manbo) running Solaris Express and an Ultra 10 (sacheto) running Solaris 10 are available for members. As well as an interest in Sun hardware, the UCC has an ongoing interest in Solaris, especially in OpenSolaris, the GNOME Desktop and Java.

To maintain relevant, the UCC must continuously upgrade the computing facilities that it offers its members. In 2006, the UCC is seeking either financial sponsorship or new hardware to make available to its members. The UCC proudly lists its sponsors on its website (www.ucc.asn.au/sponsors/) as well as in publications such as the guide to first time members. We will happily negotiate other sponsorship opportunities or sponsor benefits.

Thank you for taking the time to read this letter. You can contact us either by mail (the address is above) or by email on committee@ucc.asn.au. We look forward to hearing from you soon.

Yours Faithfully,

Davyd Madeley
UCC Secretary, 2006
