TASNETWORKS GRADUATE PROGRAM

Can you handle being exposed to every aspect of a company charged with the responsibility of delivering power safely and reliably to almost every Tasmanian, in almost every part of the state?

Can you handle an immersive process of six-month rotations across our entire business, being hands-on and creating skills and a reputation that your peers will envy?

Can you handle three years of setbacks, challenges and experiences out in the field, behind a desk and in front of the leaders of one of Tasmania's most important entities?

Every year the TasNetworks Graduate Program has hundreds of applications.

In 2019 we will take 10 Graduates in the fields of Electrical Engineering, Human Resources,

Business and Computer Science / Information Systems.

ENGINEERING

Can you sit in the driver's seat planning, designing and creating the largest single infrastructure in Tasmania? Can you make it robust, resilient and ready for tomorrow?

FINANCE

Can you contribute your skills to an asset base valued at over $3 billion? Can you help build on this financial strength with robust, bold and strategic initiatives?

PEOPLE

Can you help recruit, manage and improve one of the most diverse and highly skilled workforces in the state? Can you provide the planning and initiatives to build the culture for over 1,000 staff?

IT

Can you manage the highest level of IT sophistication and data security?
Can you do it for the state's very own high-speed telecommunications network?

BUSINESS

Can you strategise, analyse and energise the TasNetworks business? Can you work across multiple business functions delivering the ultimate business outcomes?

If you can handle the power of working with one of Tasmania's most trusted and dynamic organisations, you'd better talk to us.
