Graduate & Vacation Positions – Mining Engineer

Coal & Metal Assets

NSW, QLD and NT

At Glencore you will work with leaders in your field every day. You will be a part of a global company who want you to succeed, not just for the benefit of the organisation but also so you can achieve your own career goals. Our people are committed to working ways that embrace our values of Safety, Integrity, Entrepreneurialism, Simplicity, Responsibility, and Openness. Glencore have a number of opportunities opening up to university students to join our Mining Engineer Graduate Program (for those graduating this year) or our summer Vacation Program for those students still studying.

From day one as a **Graduate**, you get the opportunity to apply what you've studied – working in the field solving real world challenges, challenges that span and extend beyond your discipline. You will have the opportunity to gain valued experience in engineering design, reliability and project management rotating throughout the different working areas. Dependent on the site, there are a great number of additional financial benefits, including support towards your relocation.

Those students still studying will gain similar exposure during their **Vacation Program** and will contribute to critical operational business improvement projects. For those that are going to site, we will pay for travel and accommodation during your placement.

See the next page for more specific site information on the work you could be doing. Glencore provides unrivalled career and development prospects, great communities and the opportunity to work with leaders in your field.

Applications for graduate roles will only be accepted via: www.glencore.com/careers.

Graduate Applications **Currently Open and Close:** 5 April 2021

Vacation Student Applications **Open:** Mid-April 2021

Commodity Information - Mining Engineer

Specific Role Information

As a Graduate Mining Engineer, you will be developed through multiple rotations including but not limited to Mine Planning, Drill and Blast, Backfill, Operational Engineering. In addition, you will rotate through Operational Engineering roles, Scheduling and Planning roles, culminating in you being a key decision maker in the design of multimillion dollar stopes or coal mine optimisation projects. With access to some of the best technical services professionals in Australia, you will be developed through an underground or surface rotation programme that sets you up for success on your path to a statutory Managers ticket. All of our programs provide access to technical and operational leaders in the industry, who will want to assist in your development as a well-rounded Engineer and future resources sector leader.

Coal – Queensland and New South Wales

What distinguishes us from other programs is the acceleration of your skills development. We believe that rotation through a variety of teams, mining methods and locations, we can enhance your professional and practical development on a fast track towards achievement of your career goals. To support you in this growth, you will have access to our Senior Leadership team from Day 1! All of our graduates are engaged in a structured leadership development program, you have access to a mentor and a series of professional development workshops culminating in an Australia wide national conference with your peers and our business leaders.

Copper & Zinc - Queensland, New South Wales and Northern Territory

Our industry-leading and experienced professionals will challenge you each step of the way - to think differently, ask questions and come up with creative solutions. Glencore Metals offer the opportunity to experience mine to market with our two Mount Isa processing plants, four underground mining locations and our Townsville Refinery and Port Operations, we believe that rotation through our variety of teams, mining methods and locations will fast track your career. As a Glencore graduate, you'll have access to unrivalled opportunities and unlimited potential to grow your career. This is your opportunity to test your skills and creativity in real situations, working with some of the best in your field.
